

Satellite Radio is a service that I pay for, and therefore it should not be restricted from supplying me with public information. I use Satellite radio almost exclusively in my truck, and I expect to be able to access any public information that is available to me through the service that I pay for. The NAB should not be able to control public information that is transmitted to me through XM or any other satellite service. I respectfully urge the FCC to reject the NAB's petition 04-160.

Thank you!

R. Colin Craig
